I am a Post-Graduate in Artificial Intelligence from Loughborough University, UK. I enjoy exploring the unknown using the AI / ML techniques that I have learnt during my master's. My passion lies in tackling real-world problems across domains to develop data-driven AI / ML based solutions to deliver true business value. I have worked on projects involving AI/ML algorithms in various application areas such as NLP, Sentiment analysis, Cluster analysis, Decision Tree analysis, Regression analysis, to name a few.

Prior to enrolling for my masters', I have been a diligent developer skilled at creating innovative projects and always eager to learn something new I have strong technical skills with great aptitude for Programming, especially Object-Oriented Languages. I have exposure to various domains from my experience of having worked in the industry as a Developer. I have used a range of languages, frameworks, OS, and development tools as well as experienced the end-to-end Software Development Life Cycle across Predictive and Agile delivery methodologies.

Besides my technical skills, I have also been working on my project management skills. I am currently undergoing PMP certification preparation training from a PMI Authorised Training Partner.

Work Experience

Data Engineer at Edgematics Technologies UK Ltd, Reading, United Kingdom (March 2023 – ongoing)

- Spearheaded a comprehensive Data Governance project to ensure adherence to Data Privacy regulations and GDPR compliance.
- Conducted analysis on various data sources to assess compliance levels and identify potential areas for improvement.
- Utilized advanced machine learning algorithms for text analytics to establish and track data lineage across diverse data sets.
- Implemented a robust data governance tool to facilitate efficient tracking and management of data lineage.
- Collaborated with cross-functional teams to develop and maintain a comprehensive data dictionary, leveraging Language Model Models (LLMs) for enhanced accuracy and efficiency.

Freelance Full Stack Developer at Quinnox Consultancy Services Ltd, Mumbai, India (Feb 2021 – Sept 2021)

- Product analysis with clients to determine requirements in an agile development cycle.
- I was the communication channel between the business and technical teams. It was highly process-oriented to follow standardised practises throughout the development life cycle.
- Translated wireframes and designs into visual components of the application.
- Created new documentation for MaterialUI that prevented the need for a 3-week onboarding course.

Freelance Front-end Developer at Osmos Multimedia Pvt Ltd, Mumbai, India (Oct 2020 – Jan 2021)

- Conducted stakeholder meetings to manage their expectations in terms of schedule, budget, scope and quality of the deliverables.
- Collaborated with backend developers to brainstorm ideas for improving functionality and user-friendliness.
- Worked with back-end engineers to integrate the front end with the application logic.
- Used React framework for UI, Invision for laying the flow and GIT for version control.

UI Developer at ZI Systech Pvt Ltd, Mumbai, India (Jul 2017 – Oct 2020)

- Analysed customer behaviour, web traffic metrics and monitored competitor websites.
- Collaborated with UX designers and other developers to design, build, test and improve the SaaS product.
- Ensured scalability of front-end elements by optimising them for loading speed and performance.
- Converted a legacy module into Angular improving overall performance.
- Did a design overhaul for the entire product and created a style guide for it as well.

Education**Loughborough University, Loughborough, UK (Oct 2021 – Oct 2022)**

MSc in Artificial Intelligence

- Real-Time System Modelling using the Capella tool (AFDX Switch)
- Library Management System using Python and SQL
- Developing Deep Learning CNN-based model to recognize images
- NLP – Semantic Analysis, Sentiment Analysis and Summarisation
- Robotics – Working demo of reactive and following behaviours on JetBot robot from NVIDIA
- Computer vision-based system in MATLAB that is capable of discriminating images of malignant melanoma from benign lesions

Saraswati College of Engineering, Kharghar, Navi Mumbai, India (2013-2017)

BE in Computer Science with a 6.75 CGPA

- Final year project “Image Processing in Unmanned Aerial Vehicle”
- Elected as General Advisor for Saraswati College of Engineering in 2016- 17
- Elected as secretary for Rotaract Club of Saraswati College in 2016- 17

Smt Sulochanadevi Singhania School, Thane, India (2011-2013)

Indian School Certificate (ISC – Grade XII) with a score of 83.8%

- Triple jump bronze medal at Association of ICSE schools in Maharashtra athletic championship and High jump silver medal at District Sports Office, Thane District.

Smt Sulochanadevi Singhania School, Thane, India (1999-2011)

Indian certificate of secondary education (ICSE - Grade X) with a score of 89%

Skills

- ML and AI Algorithms and Techniques
- Python with VS CODE, PyCharm, Notepad++, Jupyter
- MATLAB, Capella Tool
- React JS, Angular JS, MVC Dotnet, React Native, WordPress and Frappe
- GIT and Visual SourceSafe
- HTML, CSS, JavaScript, jQuery, Java, SQL and Firebase
- Zeplin, Invision, Adobe XD
